

Let's try doing a survey on trachoma recognition of your family. If there's

anything that you did you could remember, after a week's time, write it

up. It's not too hard to do. It's just a list of things that you did.

Below 50 = Bad, should try harder. Two months later do it again to see whether the results change.

	Trachoma prevention activities	Scores	
		Yes	No
1	Mother attended trachoma meeting	10	0
2	After meeting Mother told all family members about the contents	10	0
3	Father heard messages on trachoma prevention (through commune loudspeakers, mother, local promoters...)	10	0
4	All my family members have private face towel and every one uses his own towel	10	0
5	I always wash my face towel with soap and dry it in the sun	10	0
6	My family always keeps house, kitchen, animal styles and toilet clean	10	0

movement:

I know how to sing the song "To make the whole family happier" 10 0

I help Mum and Dad wash face for my little brothers and sisters 10 0

I help my mother, brothers and sisters and the kids of 10 0

Total

Total 2 months later

(5 - 10 minutes)

Your teachers have taught you about trachoma and how to prevent this blinding disease. Your father, mother, grand father, grandmother, sisters and brothers.... have already heard about this. Let's see which of them are intelligent and have a good memory by putting A,B,C into a correct sentence the quickest. Remember to count how many minutes it takes each of them to do a sentence.

	A	B	C
1	Trachoma	wash face towel with soap	be affected with trachoma
2	Everybody should	is very	to prevent trachoma
